about company

- Kian Petroleum Company established in 2017 based on expanding the oil industry in Iran and overseas. It is a non-governmental trading company for petroleum products by providing fund for manufacturers in this field
Kian Co. planned to start its trading by digital currencies and the first transaction was paid by bitcoin in 2019. Kian is the first and only company which started trading by bitcoin in order to go beyond the sanctions against Islamic Republic of Iran
- Kian Co. is one of the active companies in trading, manufacturing, and supplying products in middle east. Kian also provides the raw material for companies One of the main goals is expanding its business in overseas market by developing services and products
- In order to have better connection and having better service Kian has attempted to have some representatives in countries like Iraq, Pakistan, and Afghanistan Furthermore, Kian Co. tried to have long-term contract with its partners for supplying higher quality products and increasing the reliability of businesses
- Iran's oil fields include reservoirs, basins and oil fields located in the soil and water of Iran. According to official data released by the Iranian Ministry of Petroleum, Iran's total crude oil and gas condensate reserves are estimated at more than 4.3 billion bpd, which is 2% of the world's oil. According to the National Iranian Oil Company, Iran's oil reservoirs can be operated for up to three years. So the proper use of these huge and profitable but limited resources. It should be one of the important policies of the activists in this field
